

Placer County Election Report

August 27, 2019, Assembly District 1

Special Primary Election

The Placer County Elections Office conducted the Special Primary Election on August 27, 2019, in the State of California. Placer County had a 27.37% turnout, with 10,131 ballots cast throughout its 11 polling place precincts and 25 mail ballot precincts.

This document presents the facts of the project in stages including: Pre-Election, Election Day, and Post-Election. It goes into every area that requires action and, while narrating the procedures followed, it will present figures and numbers resulting from the process.

While preliminary work for this project started in early 2019, this report covers the activities that start with Election Preparation. In the "Election Preparation" section of this report, the reader will be presented with the context of the election, the process for the training of poll workers, how vote by mail ballots were prepared, a description of the voting systems used, and the security measures deployed. The next section, "Election Day," describes the technical issues that occurred on E-Day and how the semifinal official canvass was wrapped up for the night. The "Canvassing" section details the post-election processes, including provisional vote processing and other relevant findings. However, canvass activities are detailed throughout the report as a whole.

I would like to recognize all of the individuals who helped the Placer County Elections Office conduct a very successful Special Primary election on such short notice. From our dedicated team of permanent and temporary staffers, to the 121 poll workers and election night workers that comprise the backbone of any thriving election, to the voters of Placer County whose participation ensures that all of our hard work matters, I thank you.

Signed this 5th day of September, 2019, in Auburn, California.

A handwritten signature in blue ink that reads "Ryan Ronco". The signature is fluid and cursive, with a long horizontal stroke at the end.

Ryan Ronco
Placer County Clerk-Recorder-Registrar of Voters

Election preparation

The election held on August 27, 2019 was a special election, as defined in section 10700 of the California Elections Code. It included the State Assembly District 1 race.

A total of 10 polling places were established throughout Placer County. To cover the staffing needs for the election, a total of 95 poll workers were placed. Through the work of staff, Placer County was fully staffed on Election Day. The number required to operate in each polling place was reached and the election was able to move forward. Poll workers were placed in Spanish and Korean targeted precincts.

Precincts and poll workers

California Elections Code section 12304 establishes a minimum number of poll workers needed to run a precinct at three: one inspector and two clerks. However, Placer County has traditionally set the minimum at a higher threshold than required by law. In Placer County, precinct boards are made up of one Inspector (I), one Judge (J), and three or four Clerks (C), four being required at precincts where there is a large number of registered voters. Therefore, the minimum number of poll workers required to operate this election in Placer County was 50, which is the result of having the minimum of 3 clerks at each of the 10 precincts (J+I+3C). During the process of recruiting the poll workers, a total of 1 quit, which required extra efforts by the staff to locate replacement workers. Additionally, under California elections code section 12303, Placer County must place bilingual poll workers in targeted precincts. 5 Spanish bilingual poll workers were placed, meeting the targets.

To source the poll workers, the Elections Office used the following mechanisms:

- Phone calls by staff to recruit.
- Worked with the Placer County Public Information Office (PIO) to recruit within the community. They posted information in the weekly Placer County e-newsletter, and on the county's website and social media pages. A press release was also distributed to media outlets throughout the county.
- Placer County management employees were recruited.
- Placer County's Human Resources Department sent an email to people on various recruitment lists telling them about this opportunity.
- Flyers posted in coffee shops, schools, community centers and other locations throughout Placer County.
- Flyers emailed to post offices, county libraries, and community centers.
- Informational letters were sent to service clubs and churches to encourage them to volunteer and raise money for their organizations.
- Recruitment flyers were sent to various organizations in the Tahoe area to post and/or email.

Voting equipment

The County deployed one AccuVote OS (optical scan) and one AccuVote TSX (touch screen) voting unit in each of the 10 county precinct poll locations for the August 27, 2019, Special Election as permitted by the Conditional Recertification for Diebold Election Systems (Premier Elections

Solutions, Inc.), now Dominion Voting Systems. As utilized by Placer County, the AccuVote TSX machines are intended for use only by voters with specific needs and supplement the County's main AccuVote OS voting system, which continues to be used as the primary precinct and vote by mail voting system in the County.

A portion of the County's previously purchased AccuVote TSX's were prepared for the election in accordance with approved guidelines and requirements, including reinstallation of software and pre-election diagnostic testing, memory card creation and installation, security seal logging and installation, and post-election diagnostics if needed. These same procedures and requirements were also followed for the County's AccuVote OS machines, and in addition, the County's ballot counting (GEMS) servers had all software reinstalled prior to the Election from the approved source media.

Security procedures

The County followed the security procedures set forth in the Secretary of State's Conditional Recertification Requirements, approved guidelines and procedures issued by Premier Election Solutions, Inc., the County's September 28, 2007 Response to the Conditional Recertification, Dominion Voting System's State of California Use Procedures for Premier branded products (submitted October 23, 2008), and the Secretary of State's procedures related to tabulating precinct votes issued. Specifically:

- No additional software developed by Diebold/Premier/ES&S, or other systems modifications, other than that specifically listed in the voting system vendor's certificate, plus Adobe Acrobat software used for ballot layout development, were installed on the County's GEMS servers running GEMS v. 1.18.24.
- The County reinstalled all approved software and firmware on its GEMS servers and the AccuVote TSX units had software reinstalled from secure, authorized media sources. Any voting machine that goes to repair has the hardware and software reinstalled.
- The GEMS servers are located in a secure, card key-controlled, camera-surveilled room within the County Elections Office; additionally, the Elections Office is located within a controlled-access County building.
- Placer County adheres to the recommended procedures and system configurations set forth in the Premier Client Security Policy and GEMS Server Configuration Guide for its GEMS servers as established and promulgated by Premier Election Solutions, Inc., and also by the Secretary of State.
- The County conducted the required logic and accuracy testing for ballot tabulation.
- Placer Elections staff reset the encryption key utilizing a unique key generated for each election for the AccuVote TSX prior to programming the units for this specific election.
- Placer has established clear separation of duties among Elections staff to enhance internal control over GEMS voting system security.
- Poll workers were trained on types and placement of security seals for both the AccuVote OS and TSX units; on seal verification requirements by poll workers; on signing of the "zero" tapes before the election and on the election results tapes by all poll workers; on allowing public observance of seals and equipment at the polls; and on use of poll incident logs.

- Required signage regarding the penalties for tampering with voting equipment and/or altering voting results was posted in each voting booth and on or near each TSX unit.
- The County did not use any unapproved AccuVote TSX or OS voting equipment models.
- All AccuVote TSX and OS units were stored before and after the August Primary Election in a secure locked and alarmed facility, with access limited to authorized staff, and which are under camera surveillance.
- All AccuVote TSX units had software replaced from the secured, approved media source.
- All AccuVote TSX and OS units were pre-election diagnostic tested by County IT staff in secure election facilities. Post-election diagnostics are done on the voting equipment as applicable.
- Every AccuVote TSX and OS memory card had a permanent serial number assigned to it. Each memory card was programmed in a secured facility by staff from the Elections Office. Once a memory card was programmed for the election, it was inserted by Elections staff into its assigned unit and sealed with the serialized, tamper-evident seal, and its serial number was logged into the County's tracking system designed for that purpose. The County also recorded the chain of custody of each memory card and voting equipment unit from the point of programming the memory card for use in the election through the time of completion of the official canvass.
- On Election Day, prior to any ballots being cast on any unit, the integrity of the TSX tamper-evident seals was verified by the precinct officials before opening the compartment containing the unit power switch. The serial number of the seals was also verified against the log provided to the Precinct Inspector and was witnessed by the other precinct officers. The same process was followed for the OS machines, as well. A complete review of all seal logs by County staff has been completed, and in cases where the integrity of the seal was questioned the Elections Office has recounted the ballot box.
- If it was detected that a seal had been broken prior to unlocking the TSX compartment or OS unit, or if there was a discrepancy between the log and the serial number, the discrepancy was confirmed by one or more of the remaining members of the precinct board, documented, and immediately reported to the County.
- Each AccuVote OS and TSX machine was checked Election Night by Elections staff when received back at the Elections Office in Auburn for intact seals and confirmation of security seal and serial numbers. There were no OS units that had a memory card failure; however, there were two precincts that were recounted by Elections staff as a precaution because of broken seals.
- AccuVote OS and TSX results were not transmitted from poll locations or regional receiving centers by modem per direction from the Secretary of State's Conditional Recertification; instead all voting equipment was brought to the County's Auburn election facility for checking of security seals and central vote tabulation.
- The required minimum one percent (of voting precincts) random manual tally was conducted in accordance with Election Code Section 15360(e). The results of these tallies are included in the Statement of Vote, which this report accompanies.
- Poll workers did not participate in any audits or recounts involving AccuVote TSX AVPM or AccuVote OS audit records for any precinct(s) for which they served as poll workers.

- Any significant, adverse issues relating to voting equipment would have been reported to the Secretary of State's Office of Voting Systems Technology Assessment on Election Day, including a complete description of the problem and information on how the issue would have been resolved.
- Each memory card from the precinct AccuVote OS voting equipment used was loaded into GEMS tabulation server, with verification of each card's upload before the next card was loaded.

Vote By Mail ballots

Placer County has historically had a high number of voters choosing to participate via the mail rather than at the polls. For this election, 75.6% of the registered and active voters in the county were part of the Permanent Vote by Mail (PVBM) program. In addition to voters who registered for the PVBM program, the County had 25 Mail Ballot (MB) precincts for this election, which accounted for 4,215 registered voters who were not assigned a poll location.

Ballots, for both PVBM and MB voters, were sent out on July 29, (E-29) directly from the vendor's printing facility to the West Sacramento Regional Mail Distribution facility; this order accounted for 37,017 ballots. Subsequent requests, of over 100 were mailed directly from our vendors printing facility. Requests of fewer than 100 derived from registration, re-registration, or requests for replacement ballots were handled in-house by printing, assembling, and dispatching ballots on a daily basis.

Placer County issued 27,770 vote by mail ballots, of which 9,503 returned to the Elections Office, either because the voter mailed it back or because the post office was unable to find the voter (undeliverable ballot). This means that 74.4% of the ballots mailed were not returned to the Elections Office by the voters or the post office.

Finally, Assembly Bill 1013 mandated the option for a voter with a disability, or a military or overseas voter, to cast his or her ballot using a certified remote accessible vote by mail system (RAVBM) beginning January 1, 2020, or one year after the date on which the Secretary of State certifies a RAVBM. Placer County was one of the first counties to implement the new RAVBM system. The new RAVBM system was made available to Placer County through a grant at no county expense.

The project was made possible by a grant from the DRAM Settlement Fund. Created as a result of antitrust litigation pursued by the Attorney General of the State of California, the purpose of the Fund is to encourage use of innovative technology to benefit California consumers.

Three voters utilized the new system for the August 27, 2019 Special Primary Election.

Election Day

Polls workers were instructed to be at the polling station at 6:00 am on Election Day to allow plenty of time for setting up the station. The setup of the polling place included installing all the Help America Vote Act (HAVA) equipment required to mitigate access barriers, organizing the precinct in the necessary layout, and setting up the AccuVote OS and TSX voting machines. At the same time, Rovers and Super Rovers were doing rounds on their assigned precincts to ensure

all necessary support was provided. The total number of poll workers who worked the August 27, 2019 election was 95 which was 40 above the minimum goal set by Placer County.

All poll stations opened promptly at 7:00 am.

Technical issues at the polls

Placer County's help desk hotline for technical issues started operating at 6:00 am on Election Day. Throughout the day a total of 1 incident that required technical support were documented, some of which required replacing certain components at the polling places. The Table below shows the distribution of the replacements that were sent out.

Component	Replacements
AccuVote OS Won't Feed	1
Total	1

Closing of polls and semifinal official canvass

Polls closed at 8:00 pm. No reports of any delays were received from any of the polling stations. At that same time, the Elections Office collected all ballots in the drop off box outside the main office in Auburn, at the drop off box located at our front counter, and checked all fax machines for any UOCAVA vote transmissions. Anything that would have arrived after that time at any of those locations would have been considered past the deadline established by state law for receiving ballots.

At the poll stations, poll workers began producing final count reports for both the AccuVote OS and TSX at each of their precincts. They also began accounting for all ballots in their precincts (spoiled, unused, surrendered, etc.), and ensuring that all the returned materials were packed according to the procedures provided by the Elections Office. Once the closing process was completed, the precinct's materials were delivered to an assigned receiving center where they were accepted into the custody of the Elections Office. After all precincts in the area delivered their materials to the receiving center, the consolidated materials were shipped directly to Elections Central in Auburn.

Trucks started to arrive at the Elections Office around 10:15 pm on August 27, 2019 and continued to do so until 11:20 pm on August 27, 2019. Each arriving truck was unloaded, and the staff proceeded to verify that all ballot boxes, ballot bags, and AccuVote units had arrived. In the same process, all seals of each AccuVote unit were verified against the log created prior to dispatching them to ensure integrity of the unit. If a unit had a broken or non-matching seal, then the precinct ballots were recounted prior to sending the data to the SOS. The semiofficial canvass was completed on August 27, 2019 at 11:30 pm.

Canvassing

A total of 32 ballots were provisionally cast in Placer County; more than 94% of them were qualified to be counted once they were reviewed by the Elections Office. Finally, ballots that were not counted were cast by voters who were determined as not qualified to vote.

Official canvass

The manual-count to machine-count comparison of a randomly-selected one percent of the AccuVote Optical Scan units deployed on Election Day. With 10 polling place precincts and 25 mail ballot, precincts, Placer County would need to randomly select 1 (one) precinct to comply with Elections Code Section 15360(e). Using the EIMS One Percent Random Sample Report six sets of precincts were selected. A six-sided die was then used to select the following precinct number on August 28, 2019: 6513204.

Two pieces of legislation, Assembly Bill 840 and Assembly Bill 759, along with a Memorandum from the Secretary of State dated November 13, 2018, mandated a cure period for vote by mail voters who had either failed to sign their vote by mail return envelopes or who had a signature that did not compare with their signature on file with our office. 130 ballots were challenged for having a mismatched or missing signature and the Placer County Elections Office reached out to voters by email, phone and/or mail in order to cure 102 of those, accounting for a greater than 78.46% cure rate.

Final results were submitted to the SOS on September 5, 2019, after all provisional voting envelopes had been reviewed and all qualified ballots were processed.

Report of 1 percent manual tally count of random precincts per California Election Code Section 15360(e)

I, Ryan Ronco, County Clerk-Recorder-Registrar of Voters, County of Placer, State of California, do hereby certify that on August 28, 2019, a one percent manual tally was conducted and completed in conjunction with the August 27, 2019, Assembly District 1 Special Primary Election.

The California Elections Code requires each local election official to conduct a manual count of all contests on ballots cast in a randomly-selected one percent of the Election Day voting precincts in order to verify the accuracy of the machine count. This manual tally occurs during the 9-day vote-canvassing period prior to official certification of election results and augments extensive pre-election testing activities to demonstrate the integrity of the vote tabulation system.

This report addresses the manual-count to machine-count comparison of a randomly-selected one percent of the AccuVote Optical Scan units deployed on Election Day. With 25 polling place precincts and 11 vote by mail precincts, Placer County would need to randomly select 1 (one) precinct to comply with Elections Code Section 15360(e). Using the EIMS One Percent Random Sample Report six sets of precincts were selected. A six-sided die was then used to select the following precinct number on August 28, 2019: 6513204.

The selected precinct/race showed exact matching tallies between the manual tally and the election summary report.

The entire manual tally was conducted in public view by hand without the use of electronic equipment, no individuals who performed the manual tally at any time during the manual tally process were informed of the corresponding machine tally results, and no poll workers were assigned to participate in the manual tally. Further, tally logs of the manual tally process were kept and have been made available to the public.

An election notice was published in the legal section of the newspaper to comply with the notice requirements. Lastly, the entire manual tally process was completed prior to certification of the Special Primary Election.

IN WITNESS WHEREOF I have set my hand and affixed my official seal on this 5th day of September, 2019, in accordance with the laws of the State of California.

A handwritten signature in blue ink, appearing to read "Ryan Ronco", with a long horizontal flourish extending to the right.
